

HIGH PERFORMANCE ECO-FRIENDLY PRODUCTS

# ENVIROWASH<sup>NP</sup>

F O R M U L A

CONCENTRATE

REMOVES LEAD DUST  
HIGHLY CONCENTRATED  
NON-PHOSPHATE FORMULA

## PRODUCT DESCRIPTION:

SENTINEL ENVIROWASH<sup>NP</sup> is specifically formulated and highly concentrated to remove lead dust when a non-phosphate formula is required or preferred. This NP formula is also available in a pre-soaked, hand-safe towel.

## DIRECTIONS: (Always follow product label instructions for best results.)

**FOR LEAD ABATEMENT:** Mix 1 part 805<sup>NP</sup> to 10 parts of water to get recommended dilution ratio (approximately 1 gallon of 805<sup>NP</sup> to 10 gallons of water). 805<sup>NP</sup> should be used before encapsulating, after active abatement has concluded and for general maintenance in reducing exposure to lead dust.

**To Use:** Wash all surfaces, ceilings, walls, floors, windows, doors, fixtures, cabinets, etc. with EnviroWash solution. Starting with the ceiling, work down to the floor. The cleaning solution should be changed (at least) after each room has been washed, and more often in larger areas. Each time the mixture is changed, workers must ensure that the used water does not re-contaminate the environment. 805<sup>NP</sup> may be applied with sponges, rags or mops, depending on the area to be cleaned. Protect eyes, especially when working overhead. Rinse if necessary. Try Sentinel EnviroTowels<sup>NP</sup> if cross-contamination, mixing and diluting, or lack of water is a problem.
