DANGER

(Contains: Petroleum distillates, hydrotreated light, 2-(2-butoxyethoxy) ethanol, Alcohol Ethoxylate) May be fatal if swallowed and enters airways.

DIRECTIONS

BLACK CUTBACK ADHESIVE REMOVAL
STEP ONE: Wet the entire adhesive surface with 770. This may be done by using a garden sprayer or by mopping 770 over the surface of the adhesive. DO NOT over apply 770 in the first step. Allow 770 to soak and penetrate for 10-20 minutes.
STEP TWO: Scrape the bulk of the softened adhesive from the surface with a floor scraper (8 inch razor scrapers are generally preferred). This will help increase the coverage of 770 and reduce the amount of liquid generated, and make final cleanup easier.
STEP THREE: If necessary, protect walls, drains, cracks, and other flooring with plastic and absorbent (rags, kitty litter or sawdust) to keep liquefied adhesive contained.
STEP FOUR: Reapply 770 as in step one. Agitate with a short bristled broom, hand held or rotating floor scrubber with stripper pads to fully lift and liquefy adhesive residue from the subfloor. This liquid may then be removed with an absorbent.
STEP FIVE: Wash and rinse the floor thoroughly with Sentinel EnviroWash 805.
