

FORMULA 747 PLUS

ADHESIVE REMOVER

Product Description

Sentinel 747 Plus Adhesive Remover is a powerful, biodegradable formula designed to safely and effectively strip adhesives left behind after removing vinyl tile, sheet vinyl, indoor and outdoor carpeting and wood flooring. 747 Plus is an environmentally-friendly, low odor product that effectively removes a variety of adhesives without the use of harmful agents.

Application Information (Always follow product label instructions for best results)

DIRECTIONS:

Before beginning work, protect all walls, flooring, carpeting, cracks or wood with an absorbent from liquid materials. This will ensure easier clean-up and eliminate potential problems.

REMOVAL OF VINYL TILE, WOOD & OUTDOOR CARPET ADHESIVES

Step 1: Wet the entire surface with 747 Plus. This may be done using a sprayer or mopping 747 Plus over the surface of the adhesive. Do not over apply 747 Plus in this first step. Allow the 747 Plus to soak and penetrate for 10-20 minutes to soften the adhesive; for wood and outdoor adhesives, allow to soak for one hour. Scrape the bulk of the softened adhesive from the surface with a floor scraper and place in a disposable container.

Step 2: Reapply 747 Plus, this time working with smaller areas (approx. 4' X 4'). immediately agitate with a short bristled broom or floor scrubber to fully lift and liquefy adhesive residue from the sub floor. For easy clean up, add absorbent to the liquefied adhesive, place in a disposable container and dispose. Follow all local, state and federal regulations when disposing of waste.

Step 3: Wash and rinse the sub floor thoroughly with Sentinel 810 All Surface Floor Cleaner to ensure a clean surface. Allow surface to dry.

REMOVAL OF SHEET VINYL/ LINOLEUM BACKING & INDOOR CARPET ADHESIVES:

Coverage: Carpet= 25sq. ft./mixed gallon
 Sheet Vinyl Backing= 40 sq. ft./mixed gallon
 Latex Adhesive = 70 sq. ft./ mixed gallon
Step 1: Mix 1 part warm water to 1 part 747 Plus and apply mixture directly onto the adhesive/ backing. Use a broom or mop to agitate and maintain even coverage while keeping the adhesive surface wet. Allow 747 Plus to soak and penetrate for 60 - 90 minutes. Scrape the softened adhesive/ backing from the floor (razor scrapers are generally preferred) and put in a disposable container.

Step 2: Repeat step one if necessary. Add some absorbent to container and dispose. Follow all local, state and federal regulations when disposing of waste.

Step 3: Wash and rinse the sub floor thoroughly with Sentinel 810 All Surface Floor Cleaner to ensure a clean surface. Allow to dry.

REMOVAL OF CARPETING:

Using a carpet cutter, cut the carpeting in 1'-3' foot strips. Mix 2 parts water to 1 part 747 Plus and pour directly onto carpet to be removed. Completely saturate carpeting with mixture and allow to soak a minimum of 2 hours. Remove carpeting and follow indoor carpeting adhesive removal directions.

PROPERTIES

Physical state: Liquid

Appearance: Clear

Color: Amber

Odor: Mild Solvent Odor

pH: Not Applicable

Boiling Point: 363-381° F.

Flash Point: 170° F.

Self Ignition Temperature: 421° F.

Vapor Pressure:<0.2 mm Hg@68° F.

VOC Content: 15g/l*

* When determining VOC content in accordance with the requirements set forth by the Ozone Transport Commission (OTC), effective 01-01-2009
