

HIGH-PERFORMANCE

ECO-FRIENDLY PRODUCTS

FORMULA

# 717 GEL

A low-odor, viscous product designed for removing tile & carpet adhesives from vertical surfaces, and cracked or degraded subfloors.

# THICKENED MASTIC REMOVER GEL

\*V.O.C. Compliant

This Floor or Wall Covering Adhesive Remover contains less than 5% V.O.C. content by weight, in accordance with the requirements set forth by the California Air Resource Board (CARB) and Ozone Transport Commission (OTC), effective 1-1-2009.

## PRODUCT DESCRIPTION

Sentinel 717 THICKENED MASTIC REMOVER GEL is designed to remove most flooring adhesives and rinse leaving no residue. When subfloors are dry, new flooring may be confidently installed. Given it's thickened formula, 717 also works better at removing mastics from cracked, degraded, or vertical surfaces while reducing the chances of mastic and remover leaking through subfloors.

## WARRANTY NOTICE

Seller makes no warranty, expressed or implied, nor accepts any responsibility for any direct or consequential damages beyond purchase price, because seller cannot control users handling, and use, or effect of that use.

Keep only in the original container in a cool, well ventilated place away from : Heat sources. Keep container closed when not in use. REFER TO SDS FOR MORE INFORMATION FOR INDUSTRIAL USE ONLY KEEP OUT OF REACH OF CHILDREN

## DIRECTIONS

### ADHESIVE REMOVAL:

**Note:** 717 GEL is a pourable, thickened product, that can be made thicker with the addition of small amounts of water when being used on cracked, or degraded subfloors, and vertical surfaces.

STEP ONE: If necessary, protect walls, drains, and other flooring with plastic and absorbent (rags, kitty-litter or sawdust) to keep liquified adhesive contained.

STEP TWO: Apply 717 to surface of adhesive and allow to soak and penetrate the adhesive for 45-60 minutes.

STEP THREE: For heavier adhesives, scrape the bulk of the softened adhesive from the surface with a floor scraper (8 inch razor scrapers are generally preferred). This will help increase the coverage of 717 and reduce the amount of liquid generated, and make final clean-up easier.

STEP FOUR: Reapply 717 and agitate with hand-held or rotating floor scrubber with stripper pads or short-bristled brooms to fully lift and liquefy adhesive residue from the subfloor. This liquid may then be removed with absorbent.

STEP FIVE: Wash and rinse the floor thoroughly with Sentinel Envirowash 805 or Sentinel 810 and water to ensure a clean surface. Allow surfaces to dry.
