Do not breathe mists. Keep away from sources of ignition - No smoking. Keep only in the original container in a cool, well ventilated place away from : Heat sources. Keep container closed when not in use. REFER TO SDS FOR MORE INFORMATION

DIRECTIONS

STEP ONE: Wet the entire adhesive surface with product. This may be done by using a garden sprayer or by mopping SC-200 over the surface of the adhesive. DO NOT overapply. Allow SC-200 to soak and penetrate for 10-20 minutes. STEP TWO: Scrape the bulk of the softened adhesive from the surface with a floor scraper. This will help increase the coverage of SC-200 and reduce the amount of liquid generated and make final clean-up easier. STEP THREE: If necessary, protect walls, drains, cracks, and other flooring with plastic and absorbent (rags, kitty litter or sawdust) to keep liquified adhesive contained. STEP FOUR: Reapply SC-200 as in Step One. Agitate with a short-bristled broom, hand held or rotating floor scrubber with stripper pads to fully lift and liquefy adhesive residue from the floor. This liquid may then be removed with an absorbent. STEP FIVE: Wash and rinse the floor thoroughly using Sentinel 805 Envirowash or soap and water solution.

KEEP OUT OF REACH OF CHILDREN

HAZARD RATING: HMIS table with columns for Health, Flammability, Reactivity, and Personal Protection.
