

HIGH PERFORMANCE  
ECO-FRIENDLY PRODUCTS

Sentinel's Adhesive Remover Wipes are formulated to remove all flooring adhesives including wet and cured urethane adhesives from most pre-finished (not-waxed) flooring surfaces and tools. Read entire label and test small area before use.

**Use as a urethane release agent:** Wipe each board with Sentinel wipes prior to spreading urethane glue to ensure easy clean-up of urethane adhesives on finished wood floor. Be sure to thoroughly wash the newly installed floor with Sentinel 810 All Surface Floor Cleaner once installation is complete. Floors will be extremely slippery with remover residue on wood surfaces.

**Directions for use:** 1.) Unscrew container cover, remove and discard foam seal. From center of roll, pull up corner of towel, twist to a point and thread through hole in underside of cover. Replace cover tightly. Pull up towel and tear at perforation. 2.) Rub area of floor that has cured or wet adhesive using a towel. 3.) If the adhesive has cured for more than 48 hours, lay a towel over the cured adhesive and let stand approximately 5 minutes. Wipe area clean with a fresh towel. 4.) Wipe entire area cleaned with a clean, water-dampened cloth.

**NOTE:** Be sure NOT to scrub the surface of the finished wood too aggressively as this will change the look of the finish. Do not allow excess remover to drip between floor boards. Close cap when not in use.

**Storage:** Store in a clean, dry area.

**VOC Content:** 0/gl- When determining VOC concentration in accordance with the requirements set forth by the California Air Resources Board.

**Warranty Notice:** Seller makes no warranty, expressed or implied, nor accepts any responsibility for any direct or consequential damages beyond the purchase price, because seller cannot control user's handling, and use, or effect of use.

**CAUTION: EYE IRRITANT.**  
Carefully read and follow directions and cautions on back panel. KEEP OUT OF REACH OF CHILDREN.
